Growth of \$100 (Since Inception)

The performance figures represent past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Call toll-free at 800-638-8790 to obtain performance data current to the most recent month-end. Returns less than one year are cumulative. Performance prior to the inception date of the share class (if any) is based on returns of an older share class, which have been adjusted for expenses.

Target date options generally invest in a mix of stocks, bonds, cash equivalents, and potentially other asset classes, either directly or via underlying investments, and may be subject to all of the risks of these asset classes. The allocations become more conservative over time: The percentage of assets allocated to stocks will decrease while the percentage allocated to bonds will increase as the target date approaches. The higher the allocation is to stocks, the greater the risk. The principal value of the investment option is never guaranteed, including at and after the target date.

The information contained herein provides only a summary and will likely not contain all investment strategies, risk disclosures and other important information relevant to the fund.
